ABOUT US

Incorporated in 2010 Mainstay Development Consultants Pvt. Ltd., (MDCPL) by a like-minded group of young and diversified professionals.

We lend our learning and expertise to providing integrated sustainable water, environmental, and social solutions for large industrial core sectors, that source process raw material from the open environment along with other institutional and community stakeholders. We help FMCG, water-intensive processes, Paper & Pulp, Textile, Mining, and Pharma sectors in undertaking scientific and technical impact assessments, analyzing and planning for mitigating issues and concerns for ensuring operations sustainability and expansion promotion. We also specialized in developing strategic CSR/business social responsibility planning, execution, evaluating, and assessing the impact of industry social performance and reporting. In this process, we build stakeholder value, partnerships convergence, and linkages for sustainability

Conclusively, we are an integrator... Today's businesses need solutions not in isolation but in integration, meeting operational and business goals on a sustainable basis. We focus on sustainability in each process. We develop, and build strategic models and solutions for sustainable business processes.

Our offerings

- ▶ Integrated Water Resource Management Services
- ▶ Integrated Environmental Services
- ▶ Integrated Social Performance and Risk Management

What makes us unique...

We provide integrated sustainability solutions customized to meet client needs and challenges.

- ▶ We integrate Environmental, Water, Social, Risk, and compliance performance areas.
- ▶ We do primary impact assessments from the very source of raw material procurement, process, discharge, and disposal.
- ▶ We develop integrated mitigation plans and provide support to execute and measure the performance of each process.
- ▶ We provide third-party audits for water, social, environmental, risk, and compliance processes

Our Services.

We offer integrated water solutions in the following areas of Sustainable Business:

- Integrated and comprehensive ground and surface water assessment and vulnerability studies for developing sustainable source water
- Source water protection and sustainable Water Resources Management
- Wastewater Management
- Greenbelt optimization solutions through phytoremediation and soil reclamation
- Environmental Assessments and baseline studies
- Regulatory Compliance Management
- Strategic CSR: Social Performance and Social Risk Management

Our value proposition...

We provide critical business value through integration to improve the sustainable performance of key business processes.

- ▶ We recognize the importance of being open to new ideas and ways of doing things.
- ▶ Actively engage in stakeholder consultations to improve processes, systems, and mechanisms for optimizing quality.
- ▶ Contribute to a healthy environment by minimizing ecological footprint at all stages of our work.

YOUR SUSTAINABILITY PARTNER...

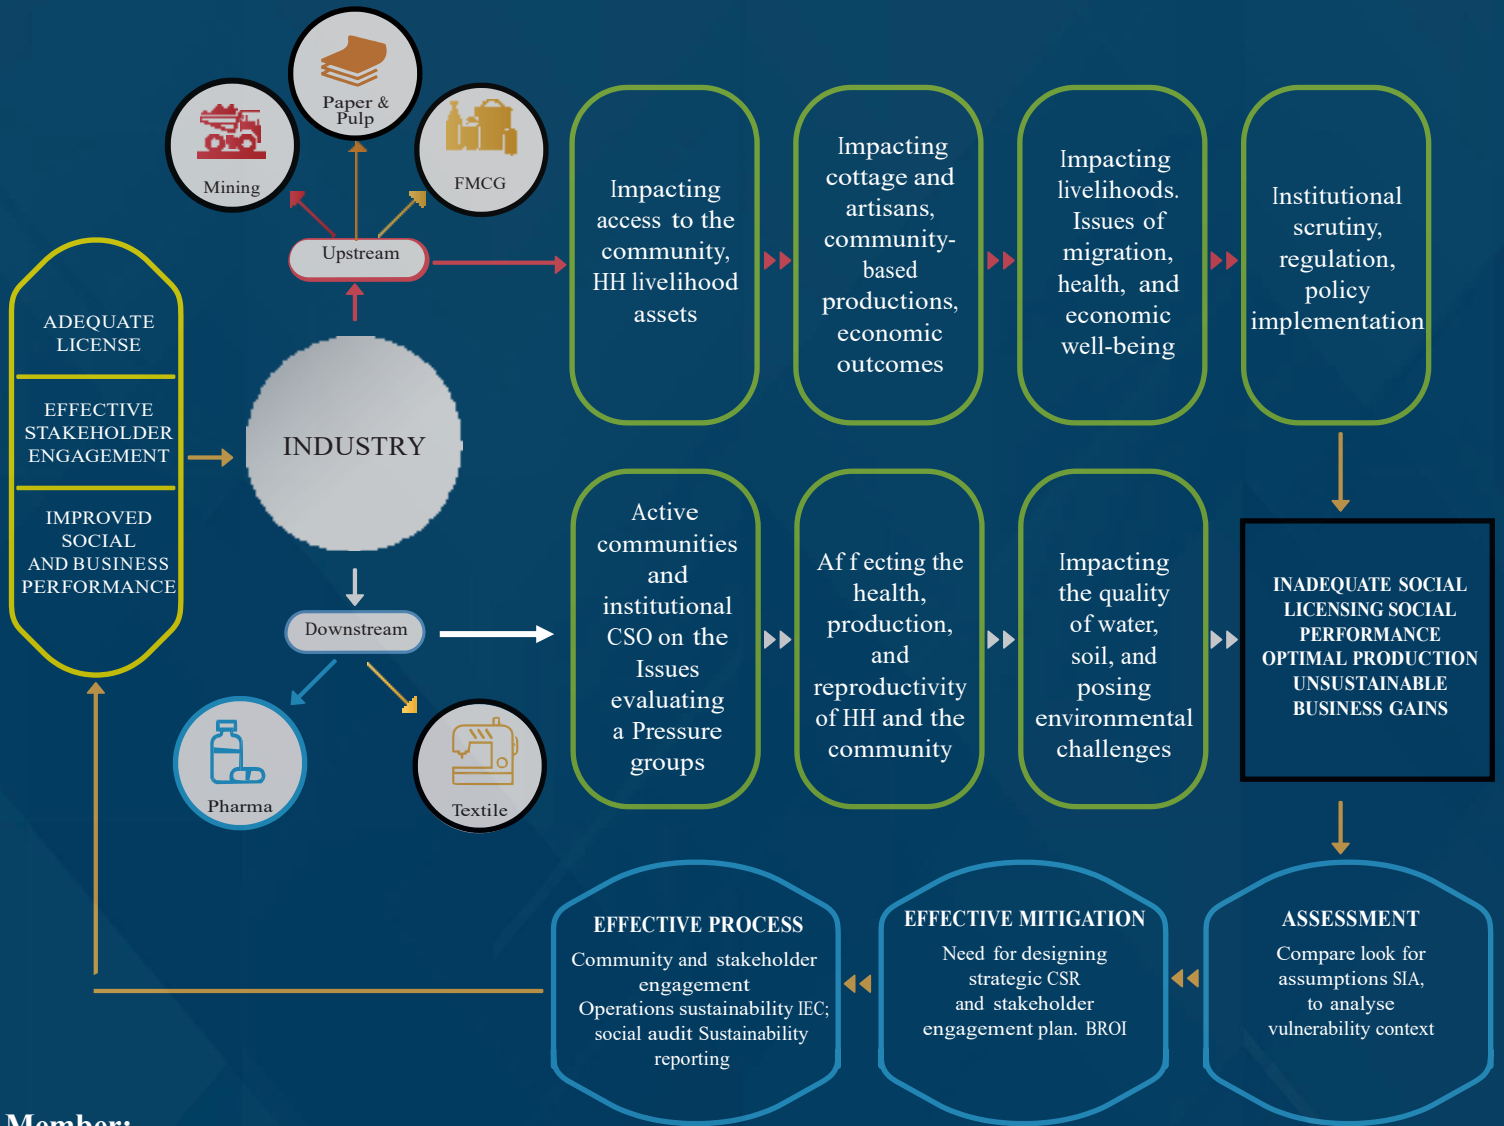

We specialize in:

- ✓ Soil restoration and remediation services
- ✓ Greenbelt optimisation services
- ✓ We help you achieve water positive + identification, recharge projects design

WE HELP YOU REACH WATER POSITIVE

We promote a watershed-based (natural hydrogeological boundary delineation) approach by mapping zones of contribution for optimal recharge - we identify, we design appropriate water recharge projects and structures.

WATERSHED-BASED INTEGRATED HYDROLOGICAL, ENVIRONMENT AND SOCIAL ASSESSMENT FRAMEWORK
